Welcome

to our American Science & Surplus catalog. Here you will find a unique mix of industrial, military and educational items, with an emphasis on science and education. We supply a wide range of unusual and hard-to-find items (some say bizarre stuff) to the hobbyist, tinkerer, artist, experimenter, home educator, do-it-yourselfer, and bargain hunter. Our items are great gifts, inexpensive supplies, and an endless reason for a giggle or a "Gee whiz!" We try to be scrupulously honest in presenting whatever we know about what we have, and always take it back, no questions asked, if the customer isn't satisfied with it. Please remember that we offer many more items than will fit on these pages. You can both peruse and purchase every item we have at our website: www.sciplus.com. Thank you for taking the time to browse our catalog. We appreciate your business.

Frequently Asked Questions

What is surplus?

We buy closeouts, inventory overruns, mis-manufactures, and items whose time has not come. We can usually acquire these items on a one-time-only basis. When a surplus item is gone, it is gone. So if you see something you love, best get it now since we may not have it tomorrow. Our website is frequently updated with our inventory. If you see an item in our catalog, but cannot find it online, it means we have sold out of that item. If our stock of the item you have ordered is exhausted we will refund that portion of your remittance. When we can't find surplus, we may carry regular merchandise which we think those interested in learning and tinkering will find appealing, but only if we feel it is good quality at a fair price.

Can I return items?

Yes. We accept all returns without question and will either refund your purchase price or send you a replacement, as you chose. Returns must be made within 30 days of purchase. For complete details, please check the order form bound in the center of this catalog.

What forms of payment do you accept?

We accept Visa, MasterCard, Discover, checks and money orders. We are sorry to report that we cannot accept CODs, cash, stamps or gold. **If paying by check, please be aware that you are authorizing American Science & Surplus to use the information on your check to make a one-time electronic debit to your checking account. This electronic debit will be for the amount indicated on your check. If you do not have sufficient funds in your account, a returned check fee may be debited from your account. If you have any questions, or choose not to have your check converted into an electronic item, please contact American Science & Surplus at (888) 724-7587.**

Do you have a minimum order requirement?

We regret that the costs of doing business preclude us from processing orders of less than \$10.00 merchandise value (exclusive of shipping and handling). We will return orders of less than \$10.00 merchandise value.

Additional information can be found on the order form bound in the middle of this catalog.

When lightning strikes a barren desert, there's nothing to hit but sand. And what happens when you heat sand to a gazillion degrees, boys and girls? That's right, it makes glass. This isn't Hollywood, after all.) Yours will measure approx 1" to 1-1/2" long and be in a plastic box along with a description of the source of that particular fulgurite.

Mylar Warmth

They have the look of something designed for the space program. They're mylar, a paper-thin shiny metallic sheet, that comes in handy when your car breaks down in winter, or when you're separated from your climbing group on the slopes of Mt. McKinley. Barring that, they're also a perfect material for a do-it-yourself cold-climate Halloween costume—near impossible to rip by hand, but cut easily with scissors. There's no padding, so they wouldn't be too comfy on your bed, but they sure are warm. They both come folded about the size of a wallet. The Blanket is 52" x 82", the Sleeping Bag is 34" x 84".

A latitudinal gauge lets you tilt the engraved dial to the correct angle for your location, and a bubble and three leveling feet allow the 1-1/2" dia lock-down compass to point in the precise direction. And if you never took it out into the sunshine, you'd still love it for the look and logic of it.

Beauteous Brass Sextant

Sextants came along after astrolabes but before GPS. (Just like you.) They're used for finding latitude and the distance between objects, and are still the non-electric, non-satellite-dependent backup for navigators. Ours is a beauty in solid brass with glass optical components, at a tiny price. Measures approx 4-5/8" x 4-1/4" x 3-1/4" overall and comes in a very nice wooden case. Includes instructions, which you're going to need unless you went to Annapolis where they still teach it. Handy for learning the principles of how a sextant works, but please don't try to find your way to Bora Bora with it, this one is more decorative than accurate.

A Little Lightning

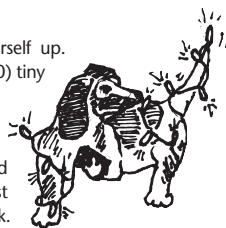

Despite parental advice, here's a good reason to sit in a dark room and think small. This Plasma Storm isn't as large as a standard plasma ball, so not only is it much more affordable - the effect is concentrated and startling. When turned on, the 3" dia clear globe (think baseball size) fills with blue stems that flare to pink, looking like dozens of electric flowers searching for a way out. Very Cool. Ouch!

Looks like a cheap kid-sized tennis racket, but brother, this ain't for the kids. It's actually a fine way for adults to work on their upper-body strength and kill bugs at the same time. 18" long, with a 6" wide paddle lined with metal grid. A coil in the handle sends high voltage through the paddle when a button is pushed; hit a bug with it and the bug will bug you no more. But despite the manufacturer's claims that it's safe for people, Scott reports that flesh-paddle contact delivers a nasty shock, nasty enough to say "Keep this away from kids!" We've seen these in other catalogs for about twice the price, so buy it from us. Just be careful with it. (2) AA batteries, not included.

92905	Poly Bag, 8" X 10"	\$6.95/each

Backpacks/Ditty Bags

These lightweight dark blue nylon bags have double drawstrings that close the top and go through grommets on the bottom corners so they work as backpack straps. Measure 12" wide x 16" deep. They were National Guard promo items so they have big red, white & blue logos on one side, but that can be turned to the back-side if you want. Note: these are field-trip cheap.

41806 Nylon Sacks \$3.95/pkg(4)

NEW!

Nine-Foot Plastic Sack

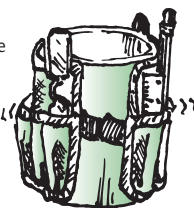

They sell this as a combo Xmas-tree skirt/tree disposal bag, but we like it for any major clean-up task. Measures 108" (9 feet) x 84" (7 feet) dia of thinnish .001" white plastic, big enough to hold the detritus from a whole-yard BBQ or a 20-person picnic.

42108 Giant Garbage Bag \$2.95/each

Mini-Organizer

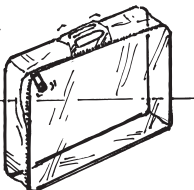

This small woven organizer is like those big ones that turn a 5-gallon bucket into a tool carrier, but it's meant to fit around a mug, cup, glass or bottle. It's 6" tall x 9" across, plus the length of the hook-n-loop tabs that snug it around a container, but it could be pinned flat on a bulletin board or other surface. It has (8) 3-1/2" deep slots of assorted widths for holding small tools, brushes, writing implements, pretzel rods, or celery sticks. We'll pick (2) from among an assortment of two-tone but always attractive colors.

41555 Mug Cozy/Organizer \$3.95/pkg(2)

The See-Though Suitcase

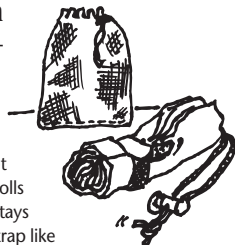

Not so good for travel, but just right for home storage, this clear vinyl "suitcase" measures 28" x 20" x 6" thick. It has a wired black frame, a zipper around three sides and a pull-out carrying handle of the same clear vinyl. It stores flat and expands when you need it. Nice quality, less expensive than bulky plastic bins, and very, very convenient for under-bed storage.

41134 Clear Under-Bed Bag \$24.95/pkg(6)

These Are A Cinch

You pick a gender-appropriate nylon laundry bag, pink or blue, 21" x 16" with a locking clip on the drawstring closure, to separate dirty or wet clothes from clean ones. It rolls up when not in use and stays rolled via a hook-and-loop strap like the one on your collapsible umbrella.

42065	Blue Laundry Bag	\$2.95/each
42067	Pink Laundry Bag	\$2.95/each

Monkey Dishes

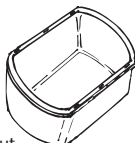

Little bowls like these are called monkey dishes in the restaurant business. Doesn't pay to ask why, we think, but they're extremely handy. These are stainless steel, 4-1/2" dia x 1-1/2" deep. They're marked "Pet Bowl," but wouldn't work for anything over kitten size. We'd use 'em for peas, paints, pickles, peanuts, paste, prune pits, like that. You run out of p's, you could use them for ketchup, mustard or mayonnaise.

40453 Small Steel Bowl \$4.95/pkg(3)

Tub For Toys

Originally intended for hospital use (Think Nurse Cratchit. Think cold, wet sponge baths.), these 12" x 9-1/2" x 4-1/4" deep washbasins have rounded ends and flat lips. The #5 plastic is that wonderful institutional-yellow color. But they're indestructible, short of melting them, and they nest when not in use. Use them to store your craft supplies, the kid's action figures, the cat's squeeze toys. Or take up nursing.

91728 Washbasin \$1.00/each

NEW!

16mm Rides Again

16mm film may be gone, but those flat cans they were stored and mailed in live on. We've got about half a gazillion of them, all used and most covered with stickers, titles, numbers, nicks, scratches, dents, dings and other authenticating details. Measure between 7" and 14" dia and from 3/4" to 1" thick in assorted colors of steel or plastic. We'll pick three different ones and mail them to you, OK?

42142 Film Canisters \$7.95/pkg(3)

Pills With Punch

Add a little pizzazz to your nitro pills! This 1-3/4" x 1/2" dia container for meds is anodized aluminum in mostly silver but also could be in blue, turquoise, purple, red, gold (our choice). It's gasketed so it's watertight. We recommend cleaning the inside with a cotton swab dipped in alcohol before using, since some have a bit of rust-colored residue in them. Flashy!

92287 Pill Carrier \$3.75/pkg(3)

Dropper

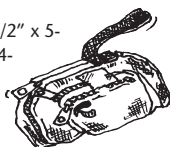

Eye dropper, tongue dropper, test tube dropper, petri dish dropper, anywhere dropper. Use this 3" glass dropper, with a rubber squeeze bulb to drop small amounts of liquid wherever you think they should go. You will have to measure by counting drops, though, because there are no markings on it. Also, it is called "3" because that is about how long the glass tube is. Overall, it is 4" long.

89039 Dropper, 3" \$2.75/pkg(8)

For Pouch Potatoes

Our dark blue canvas zippered pouch is 7-1/2" x 5-1/2" by approx 2" thick, with a second, 4-3/4" x 4-1/2" zippered pouch on the front. An unobtrusive and unidentifiable (at least to us) logo is stitched on it, and on the back are (2) elastic straps and a snap-open belt loop perpendicular to them, so you can wear it vertically or horizontally. No belt? It has a 5" long wrist strap.

42013 Long Trays \$2.95/pkg(30)

Rubber Baby Bumper Bottles

"Very interesting," our chief bottle washer said. This 3-1/16" tall x 1-7/16" dia glass bottle has a cream-colored rubber coating on the outside and a 15/32" ID mouth, with a little lip like an old-time baby bottle. The coating may make the bottle less likely to break if you drop it; It will certainly make it less likely to scatter shards of glass all over the floor! Holds approx 30ml (1 oz).

40667 Coated Bottles \$2.95/pkg(10)

40938 Orange Rubber Stoppers \$2.00/pkg(20)

Just stick your drawers or shirts or whatever into the bags, seal them and roll 'em up to push the air out the one-way valve. Gives you 70% more space they say, and you can't lie on packaging. You get (3) bags, (1) each at 28" x 20"; 24" x 16"; and 20" x 14".

Made in the USA, dandy for crafts of all sorts and can hold pretty much anything together.

42259 Baling Wire \$9.50/each

Cable and Cable

We wouldn't use them to lock up the Harley, but these 30" long x 3/8" dia stranded-steel cables are perfect for light-duty applications. We'll pick a pair coated with clear, red, green or black vinyl, because we can. The end loops are 1" dia. Add a tiny padlock and they're belts for skinny hipsters.

Killer Magnet

Once upon a time, a copywriter put this little magnet next to his computer monitor and got really pretty, wavy, aurora-like effects. And then got a new monitor! Don't try this at home. Our shiny, silver-colored 1" x 1" x 1/2" neodymium magnet looks innocent, but is industrial strength, pulling something like 25 lbs with enough strength left over to erase all your credit cards. And wreak havoc with your monitor.

38694 Killer Magnet \$14.50/each

NEW!

Square Deal

This unplated neodymium magnet is 5/16" square x 1-1/2" long with a hefty 10-lb pull, which means if you stick it on the fridge it'll take a several lads to peel it off, or you're going to have to drag it across to the edge. The lesson here? Don't put this on your fridge without a "slider" behind it! Made in the USA.

41365 Neodymium Stick \$3.95/each

A Real Grabber

Okay, it isn't the cheapest magnet in the warehouse - but we dragged John's 165 lb filing cabinet around the dock with this 4-7/8" x 1" x 3/4" ceramic magnet, we're rating it conservatively at 100 lbs of pull, and we think it's a bargain. It has a 6" bracket with mounting holes on 5-1/2" centers, plus a 1/2" ID eyehook bolted into the center of it. It's all set to troll the bottom of the lake next time your filing cabinet falls overboard.

91949 Pick-Up Bar Magnet \$10.95/each

This 5/8" dia x 5/8" long solid cylinder is an unplated neodymium magnet that will take about 10 pounds of effort to get off your file cabinet. Even if you hang your heavy coat on it and it slowly slides down, it'll still be hangin' onto that cabinet!

Egg McChameleon

Another gem plucked from the A.S.&S. mirabilia. The shape and size of a hen egg, this opaque stone (or matte-finished glass - we're not sure which) is interesting in itself. Touched with a red penlight in a dark room, the entire egg becomes a brilliant ruby color. Blue light/blue egg, etc. Fun and fascinating, and with a little sleight of hand, a sure way to convince the plebeians that you have some mysterious metaphysical power. **⚠WARNING: CHOKING HAZARD-Small Parts. Not for children under 3 yrs.**

Wow! Double Wow!

This is Philip's new favorite toy, since he blasted a rocket so high over our parking lot that he lost sight of it (the rocket, not the parking lot). The Air Burst™ Rocket system has a 26" tall, air-powered tri-pod launcher made of plastic and rigid foam. A 65" long air hose connects it to any stand-up bike pump. After a few pumps, the air pressure bursts a replaceable booster disc in the launcher and sends a 10" x 3/4" dia rocket 250 to 1000 feet into the air. Wow! The system includes the launcher, (2) rockets, and (60) boosters (two different weights). Sending rockets out of sight, even if they usually come straight back down, is an ingenious ploy for selling extra rockets. Our each is a pack of (2). And having extra rockets is an ingenious ploy for selling extra booster discs. Our each is another bag of (60). Warning: The Air Burst™ Rocket is for ages 10 and up, with adult supervision. Don't let us catch you out there without a kid! **WARNING: CHOKING HAZARD-Small Parts. Not for children under 3 yrs.**

All you add is (2) "AAA"s and a little love. Like most hamsters, they come in two-tone light brown, dark brown or black, over white. We'll pick one, shall we? And you can order as many as you like--electric hamsters are no longer an endangered species.

Ga-Boooooiiiiinnngggg!

The manufacturer calls it the Thunder Tube™. We call it indispensable for the amateur Foley operator. It's a 7" long x 2-1/2" dia PVC tube with a resonant head at one end attached to a 17" long x 3/16" dia extension spring. Shake it, scrape it, wiggle it, use your palm to muffle it and you generate creaks, deep warbles, rumbles, weird heterodyne-ish gong effects, wa-wa's, rude noises, and, yes, realistic thunder. A perfect musical companion to your cuica and rain stick--and good, clean fun around the house. Don't make a sound-track without it.

Screeching Monkey Superhero

Look! Up in the sky! It's a screeching flying monkey to the rescue! And at a screechingly low price. Our hero is an 11" long stuffed monkey in superhero togs (a cape, and maybe a mask or hood, depending on his sartorial whim). Put two fingers in the little pockets on his paws, pull his bungee arms back, and let him go. He'll fly a good 25 feet or more, issuing hideous monkey screeches all the while, faster than a flying nun and able to brighten up a day in the office in a single bound. **ΔWARNING:** CHOKING HAZARD-Small Parts. The biggest improvement ever in flying screaming monkey technology. A must-have for Screaming Monkey fans. **ΔWARNING:** CHOKING HAZARD-Small Parts. Not for children under 3 yrs.

Drinking Bird

You're buying the drinks and this wacky, yet debonair, bird with a top hat and plastic base (7" tall OA) can't get his fill of water. Get him started, and he dips his beak into your glass repeatedly. How? Fluid inside his glass body condenses from the evaporative cooling of the water off the bird's beak, making it top heavy and dunking it back into the water. The condensate rejoins the liquid pool in the bird's bulb, and he tips up again. Process continues indefinitely. It works, but it's not any more than moderately well made, and not any more than moderately priced. **WARNING!** The fluid and dye inside the bird can permanently stain, and the bird's glass body can easily be broken. Children are fascinated by the bobbing bird, and the educational possibilities are great. But they should watch him, not fondle him!! Manufacturer warning states this item is not intended for children 8 and under. **ΔWARNING:** CHOKING HAZARD-Small Parts. Not for children under 3 yrs.

Original Slinky®

Does anyone need to be told what a Slinky(tm) toy is?? Okay, it is a very slack spring, 2-7/8" dia x 2-1/2" long, compressed. It will stretch out to about 5 or 6 feet long without deforming. That's the boring part. The interesting part is that it "follows" itself. Slosh it from hand to hand. Put in on the top step of stairs, flip the end down a step, and watch it walk down stairs, or down an incline. Believe us, no childhood (or adulthood) is complete without an original stainless steel Slinky(tm). It was hard for us to find it, but we are glad we did. Authentic UFO Solar Balloon

Fill this 10-foot x 2-foot black polyethylene solar balloon with regular air (found in any park), wait a few minutes and the sun (assuming there is sun), will heat that trapped air and make this thing rise like a UFO. We know it's authentic because it says "UFO SOLAR" right on the side. Funny they couldn't "identify" this flying object, considering they made it themselves. Includes a couple hundred feet of nylon tether so it can't escape to its home planet, wherever that may be.

It's plastic, just 5-1/2" long with a 3-1/2" dia bell, 3" long fold-out handle, and a lanyard. In lively colors, so even without a lanyard, it would be hard to lose. Bonus: it plays Happy Birthday! You Say You Wand Bubbles?

If Lawrence Welk had had this, he's still be making Champagne music. Unfortunately he's gone to that great bubble factory in the sky. This contraption looks like a wizard's wand or a whimsical cop's night stick. Measures 14" long and is full of bubbly stuff. Unscrew the handle, pull out the wand and wave it to create giant bubbles. Refill it with soap and water and it'll last longer than the Lennon sisters.

Incredibubbles!

We love these! You're going to love these! Your kids are going to love these! Hundreds of clear marble-sized bubbles can cover the floor, cling to the sides of furniture, land on your arm. They float enchantingly, rising on air currents you can't even feel. After a few seconds, the bubbles are hard enough to catch or stack. Some will still be perched in out-of-the-way spots a day later. Touchabubbles goop, thicker than the bubble-blowing liquid you're familiar with, comes in a 4" plastic test tube with a wand built into the cap, and a clip on the side so you can carry it in a shirt pocket. The goop is nontoxic, but it tastes really bad, and you probably won't want these landing on expensive tabletops, so kids under 8 should have adult help with them. They should be sharing the fun anyway! **⚠WARNING: CHOKING HAZARD-Small Parts. Not for children under 3 yrs.**

Lampless Lava

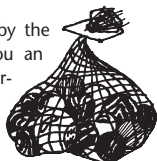

Clear acrylic sealed tube, 3-1/8" dia x 8" tall, divided into two equal chambers. The dividing wall has a hole in the center, and the tube has a quantity of viscous violet goo (glycerin?) in it that fills one chamber about 3/4 full. Stand the tube on end with the full chamber up, and over a 10 minute period the goo will ooze from the upper to the lower chamber, blowing bubbles and dribbling droplets in the process, all in slow motion. The action is somewhat reminiscent of a lava lamp, without the heat and light, and with a mixed air and goo chamber that yields much more interesting patterns. Mesmerizing, disgusting, fascinating, soothing. It comes in a variety of colors from which we will choose yours.

Underpants In A Can!

Emergency underpants in a can. Says it all, doesn't it? Quite stretchable in a Tyvekish white fabric, "one pair fits most adults." They're hip-hugger, semi-bikini, translucent type drawers, so despite the smiling man wearing them and a red bow-tie on the can, some (insecure) guys might find these just a touch jeune fille-ish. "Safe, Sanitary, Secure." Says so right on the 3" x 1-1/2" x 2/3" flip-top metal can. Better buy (3) in case of a long weekend.

94417 Canned Underpants \$4.50/each

Squirrel Briefs

For squirrely lawyers? No, that would be stupid. These are genuine squirrel underpants. Nothing salacious, just your standard white cotton jockey-type drawers with an elastic waist. These are XXXXS, with a 9" waist, but for squirrels they're pretty much one-size-fits-all. (Will also fit most guinea pigs but are probably over-sized for the average gerbil.)

93894 Squirrel Shorts \$6.50/each

Accountant In A Jar

Or in the lid, actually. Jobar's Money Machine is a clever little bank that counts your change as you put it through the slot on top, and keeps a running total up to \$999.99. (That's more than the jar will hold, of course, but you could always attach the lid to a 55-gallon drum.) Measures 6-3/4" tall x 3-1/2" dia in clear plastic, and you add a pair of "AA" batteries. Counts quarters, nickels, dimes, and pennies only.

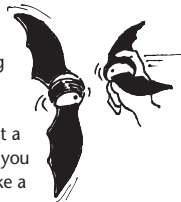

93475 Money Machine \$8.95/each

92293 "AA" Alkaline Batteries \$1.95/pkg(4)

Lemme Play! It's My Bat!

When it's your bat, they have to let you play. Better bring the gyroscopic Batwing Flyer™. This 2-3/8" dia rubber ball has a spinning gyro center and 9-1/2" long molded rubber bat wings. Practice with it a little (it's a bit like throwing a slider) and you can throw it like a ball and watch it fly like a bat. Complete with little bat eyeballs.

94226 Batwing Flyer \$7.95/each

What's Two Feet Wide & Hairy?

Our only magnetic mustache is a classic handlebar, but measures over 26" wide x 5-3/4" high and isn't really hairy, but is printed with a photo reproduction of actual black mustache hair on 1/16" thick sheet magnet rubber. Paired with our giant, 6-7/8" dia, googly eyes, these could turn your minivan into a parade float or keep the toddlers out of the refrigerator for years.

94684 Giant Mustache Magnet \$14.95/each

Carries excerpts from The Raven and The Tell-Tale Heart on the sides to read at lunch. ("I felt that I must scream or die!") Carry your tuna sandwiches in it or put it in the garage for 75 years so your great-grandchildren can get rich on Antiques Roadshow.

A Week's Worth Of Whoopee

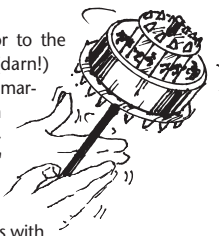

A gallimaufry of gags; the prankster's pantheon. Our seven-day selection of sophomoric stupidity includes a joy buzzer, a bottle of disappearing ink to spill on someone's white shirt, candy that turns to blood in your mouth, a pack of gum with a mousetrap inside, a nice fake nail to put through a finger, a fly-in-the-ice cube, and the American classic whoopee cushion. Add some rubber vomit and you've got enough gifts to get through Chanukah. **WARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

Paper Praxinoscope

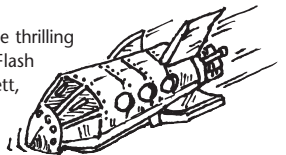

The praxinoscope was the successor to the zoetrope, and both precursed (darn!) motion pictures. This praxinoscope, marketed as the Crystal Animator™, can be assembled in 10 minutes. The finished scope is 4" dia x approx 2-1/2" tall with a 10" long spinner/handle. Spin it and watch the horse appear to gallop in the mirrored core. Comes with (18) pre-printed strips—including the horse, people, pigs and many more, and (4) strips with line drawings—but you can create your own, which is twice the fun, on the reverse sides.

Retrorockets

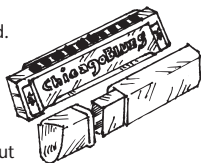

Return with us now to those thrilling days of Buck Rogers, Flash Gordon, and Tom Corbett, Space Cadet. These little 3" long retro-styled spaceships are replicas of what people flew into outer space in before anyone ever flew into outer space in the first place. Pull-back powered for desktop fun and perfect for stop-motion animators. We have (4) styles; you'll get (2) different ones. **WARNING: CHOKING HAZARD-Small Parts.** Not for children under 3 yrs.

Blues Harps X Three

You say you've got the blues? Good. Now find two unhappy friends and get this duo of 2-1/3-octave harmonicas. They're in the people's key—C—and they're blues harps so they won't do a full diatonic scale, but they don't need to. Lucite frames with metal reeds and trim, they come in plastic carrying cases so they won't drip residual spit in the pocket of your nice skinny black suit.

94674 Blues Harps \$5.95/pkg(2)

Back To Basics

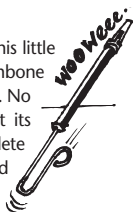

It could have been called an Alabama Buzzer after Alabama Vest, the man who invented it. Or a Clegghorn, after Thaddeus Von Clegg, the clock master who fabricated the first one. But the hand-crafted 4-3/4" long steel instrument was a simple amusement, and the 1840s were a simple time. So it's simply a kazoo. **⚠WARNING:** CHOKING HAZARD-Small Parts. Not for children under 3 yrs.

92395 Kazoo \$2.75/each

Play The Piston Flute

Or the Swanee whistle. Whatever you call it, this little slide whistle (just consider it the smallest trombone in the universe) has an outsized musical history. No elevator has ever fallen in a cartoon without its accompaniment, and no jug band is complete without one, but Louis Armstrong also played one on his Hot Five recordings, and Ravel even required one in an opera score. In assorted plastic colors with a steel slide, 6-7/8" long x 1/2" dia.

93011 Slide Whistle \$3.25/each

Be The Life Of The Party

Ever been a piano man at a party with no piano? Never again! With this electronic piano necktie you can look spiffy and carry your instrument around your neck. Just finger the one-octave, non-chromatic keyboard and the notes will waft from a speaker cleverly disguised as a Windsor knot. Has a breakaway neck cord, so there's no fear of strangulation from unappreciative audience members. We provide the replaceable button-cell batteries.

94196 Piano Tie \$10.95/each

Blues Harp

From the harmonica kings themselves at the Hohner company, comes this 4" long, 3-octave plus, plastic harmonica, in C, the people's key. We'll pick one in an attractive shade of red, green, blue, yellow or whatever color shows up next, and send it in a little vinyl case.

93498 Harmonica \$2.95/each

Tropical Stress Fruit

What's yellow, 7-1/2" long and lowers your blood pressure? The Stress Banana. Filled with some sort of gooshy fluid that we can only imagine, it's squeezably soft and returns to its original banananness right in your hand, which CJ says is "strangely cathartic," and who among us can't use a little catharsis from time to time?

94540 Cathartic Banana \$6.95/each

Give Someone The Bird

It's the Gold-Beaked Kooshy Penbird. The Penbird is 8-1/2" tall and looks like a one-legged cross between the roadrunner and Jar Jar Binks, with kooshy-ball feathers. Pull his leg and it slips out of his foot to reveal a black-ink ballpoint pen that you won't see on everybody else's desk. We'll pick a couple of Penbirds in alarming purple, blue, green or orange. **⚠WARNING:** CHOKING HAZARD-Small Parts. Not for children under 3 yrs.

94615 Kooshy Penbird \$3.95/pkg(2)

A Ring Of Pirates

You can't be a pirate without an official flashing pirate ring. This cast-zinc ring has a bearded pirate head with a skull & crossbones hat. Turn the head and watch the mouth and un-patched eye flash yellow. The inside diameter is 11/16" which makes it a size 7, so we're talking kids, lady pirates or a pirate pinkie ring. (Yes, a pirate who is secure in his masculinity would too wear a pinkie ring.) Why so cheap for pirate booty like this? Because the (2) AG7 replaceable button cell batteries it comes with might or might not be bad. **⚠WARNING:** CHOKING HAZARD-Small Parts. Not for children under 3 yrs.

Chinex??

Rejoice, we have finally found a source of reasonably priced borosilicate glass. This is the kind of glass in the trade marked Pyrex™ and Kimex™ labware. The stuff you can put right over the flame of the Bunsen burner, or directly onto the hot plate. This stuff is imported from China, and is considered student grade, which is good enough for anything but the most exotic applications. Compare the prices below and you will see that they are around half the U.S. equivalent. Call us for larger quantity prices. All are graduated except the test tubes.

Un-Bunsen Burner

So you don't have a gas jet in the garage? You don't think Margie and Ted are old enough to handle the high temperatures of a Bunsen burner? Our alcohol lamp is the answer. It burns alcohol (available at the hardware store), and is hot enough to boil water, to soften glass tubing for bending, and to generate the chemical reactions generally called for in science projects. The lamp is shaped like a long-necked ink well, 3-1/2" tall x 3" dia at its widest point and comes with a wick assembly and a handy little glass lid/extinguisher.

Lookers!

The kids need presents for all the grandmas and great-aunts? You volunteer at the nursing home and need token gifts for your L-O-LS? And your eyes aren't so good, either? Our each is really half a dozen pretty little magnifiers with round lenses and fancy handles. The handles are silver-bright (hard to believe they're aluminum) and all different. Each has a discreet hole in the tip for a jump ring so it could be worn on a necklace - but it would look just as pretty on a desk. The overall length of the (6) magnifiers varies from about 3-3/4" to 5", the lenses from 1-1/4" to 1-3/4" dia. All are approx 2X magnification. Mary Ann's pick of the month.

Great Gift!

See It Again, Sam

A Sherlock Holmes-type magnifying glass is good, but this is better. It frees your hands and throws light on the subject! This 120-volt magnifying desk lamp has a heavy 7-3/8" x 5-1/2" x 2" base with a power switch, standard lamp cord, and 11" gooseneck ending in a 5-1/4" dia shade. Under the shade is a circular fluorescent bulb and a 3-3/8" dia lens with a flip-back cover. The box says the lens is 5X, we think it's closer to 2X. Either way, it's a major improvement if you need help to examine scientific specimens, to inspect stamps or jewelry, or just to read. And we won't even talk about how your nail care is going to improve after you see your cuticles under this thing!

The Phone's For You

Direct from the 1950's, new rotary phones made by Dynalec Corp for the US Naval Systems command. They all have leads and some will have plugs (if not, they're easy to add) and they all work, although they won't navigate those annoying touch-tone menus, like ours. On the other hand, they will take you back to the nostalgic days of yesteryear, when hands-free meant that the handset could be tucked comfortably between your ear and your shoulder. Request any color you want, as long as it's black. Perfect for explaining the phrase "dial the phone" to your kids, or for realizing your personal mad-men fantasies. Again, we'll say that many of these phones do not come with a wall plug and you may need to splice your own.

Draw, Pardner

This 4-draw, plated steel radio antenna is the sort that sprouted from the fenders of gas-hogging American iron before engineers started burying them inside windows. Measures 38" when fully extended and is mounted on a 13/16" dia x 1-5/16" tall base with a mounting wing. You'll need 8-3/4" clearance beneath the base, unless you carry it as a collapsible epee, or a classroom pointer.

The Magic-8-Ball Telephone™ functions as a regular phone (really) but also gives you (24) helpful answers in a believable stentorian voice every time you lift the 5" dia ball/phone from its 2" deep cradle. The ball comes with a phone cord to connect to a wall jack, and opens to reveal push buttons and become more ergonomic. And yes, the ball/phone can be removed from the base and stand alone when you get tired of hearing the voice or have no more questions. You'll need to add (3) "AA" batteries, and ignore the box, which may be a little banged up, since it lived on a store shelf in a previous life.

Super-Thin HDTV Antenna

Break free of cables with this passive RCA HDTV antenna that's so thin it virtually disappears. Made to receive free HD/VHF/UHF signals, the antenna is a pair of extremely thin black plastic wings, each 14" long x 3" tapering to 3/8". Overall, it's 29" long x approx nothing deep. The center connector has a 50" length of thin COAX cable with an "F" connector to mate with the TV input. Marked refurbished, but you can't tell them from new. A little assembly is required.

Blow Up Your Radio!

Putting extra air in airwaves, we're proud to present our first inflatable radio. Measures 14" wide x 10" tall x 6" thick when inflated. Okay, the radio part is your basic AM/FM transistor job, 3-3/4" dia, but it slides right into the center of the blow-up, boom-box complete-with-handle case. Might even float (we didn't check) but if you take the radio out of the center and leave it on the blanket, its now-empty space will definitely hold and keep your coffee warm (or your beer cold) while rendering them nearly spill-proof.

Annoy The Neighbors!

It's the universally used AudioVox® AS-990 siren car alarm siren with (6) sonic patterns, each one more annoying than the last. Draws 1.2A at 12VDC and is conservatively rated by the manufacturer at 120dB, which is the same as a Clash concert but slightly more melodic. Black casing measures 3-1/4" x 2-7/8" dia in a bullet-shape on a pivoting metal plate with 6" leads.

From The Golden Past

This Motorola Golden Voice speaker is vintage, we're just not sure what vintage. Based on its shape, we think it's from a car radio. What we know for sure is that it has a 4-Ohm impedance, measures 4" x 10" x 2" deep and is mounted on particle board that measures 4-3/8" x 11-1/4" with mounting tabs on the long ends. Voice coil is 1-1/8" and it has a pair of quick-disconnect terminals. No wattage rating but our vintage speaker expert (old, but still working) says it'll be OK for up to 10W or so. Made right here in the USA, so you know it's vintage.

Verisimilitude Is Everything

Almost Real

And close enough, because sometimes the threat of security will do. Our simulacamera looks like the real thing, even though it isn't, with an activation light and a quite real motion detector that causes the "camera" to pan from side to side. The unit measures 3-3/4" x 2" x 2" with a 1-1/4" dia lens. It's mounted on an adjustable 4" x 1-1/8" x 3/4" arm attached to 3-1/8" dia baseplate with (2) 3/16" mounting holes. The angle adjusts from 45 to 180 degrees, and the motion detector starts the head swinging 20 degrees in either direction for approx (15) seconds. Fallout Shelter Sign

They're Back! Those of a certain age will remember being taught to crouch under their school desks in case of nuclear attack. Shortly thereafter, the gov't, in its infinite wisdom zoomed about thecityscape plastering black and yellow signs on buildings with basements to designate them as fallout shelters wherein it stored cans of water and radiation meters which were so insensitive that any reading could only mean the past tense of crispiness. We have a quantity of these signs, brand new in the sense that they have never been plastered, but antique in the sense that they are the Fifties originals. 10" x 14" , 25 ga. galvanized steel. They have a black base coat on the front over sprayed with orange/yellow reflective paint in the familiar design rendered nearby by our faithful artist. This is a true collector's item fetching \$50 and up in antique stores! A tasteful addition to even the dullest basement hangout.

The Balloon Is Up

These balloons are expressly made for hand-gun target practice, on a range, although we're fairly sure they wouldn't care if you shot them with a rifle. Probably wouldn't care if you used them for party decorations, since they're balloons. Sort of eight-shaped, or like weebles, so you could draw faces on them if you wanted to. They're approx 27" tall x 15" dia when inflated, and most will be a yellow or green shade.

I Will Survive...

You will survive, too, just like Gloria Gaynor, and in the woods, even. But only if you have this U.S. Army manual, cleverly titled: SURVIVAL, Department of the Army Field Manual FM21-76. It's 287 heavily illustrated pages of techniques for staying alive (add your own BeeGee jokes here) including orientation; food & cooking; fire- and shelter-making; rafts; animal, insect and plant recognition; and much more. This is the 1970 edition, but staying alive in the woods hasn't changed a whole lot since then. In soft-cover.

We're loving this lightly used olive drab canvas briefcase-saddlebag from the Chinese military. This 16" x 11" x 3-3/8" carry-most has full-length double pockets with tie-down covers on both sides separated by a 2" space, but flip it over and it's a briefcase with the pockets on the inside and with buckle ties to hold it shut and a canvas carrying handle. Our sample has a few Chinese characters in black on one inside flap, but that just adds to the authenticity, we think.

Riot Helmets From Quiet Riots

These police riot helmets have been very lightly used at your smaller riots, so they're in lovely condition. Taken out of service due to slight changes in the county seal deal on the front, they're two-tone, a beigey-goldish color and a nearly black dark green, with a short visor. One-size (large-ish) but adjustable with a strap across the back of the head (like a military helmet liner) and an adjustable chin strap. The flip-down face shield will have a few scratches for verisimilitude and is easily removed, but it will keep the bugs out of your teeth on your scooter.

...Into The Wild СИНИЙ Yonder

Our usually impeccable research, hampered by CJ's limited knowledge of Cyrillic, suggests these military hats (they'd the Class-A dress hats in the US Army, or "saucers") once adorned the nogginns of Russian air force members, although only briefly from the good condition. Dark olive with a stylish dark teal band, matching piping around the top and a black plastic brim, they're insignia-free. They're also a little pin-heady, at U.S. Sizes 6-5/8 through 7, but we'll pick anyway because we're short-handed in our Military Millinery Section.

Shrink-To-Fit

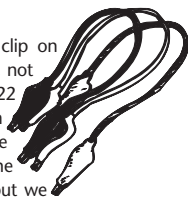

Like blue jeans, but for wires. So you can color-code those wires instead of getting all confused. You get a 10-pack of 12" long x 9/32" pieces of heat-shrink tubing, (3) each of white and red, (4) of black. Rated for up to 600V 125°C. UL.

They come in an assortment of five colors with two leads in each color. The manufacturer calls them heavy duty but we would restrict them to the light currents and low voltages you will be using in your home experiments. Our each is a set of (10).

Socket To The Gator

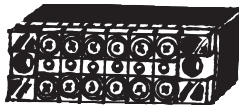

What we have here is a standard medium bulb socket attached to a pair of insulated alligator clips with 5" leads, plus a screw-in medium base two-prong outlet, which turns any light into a 120VAC socket. Time was, it was part of a fusebox tester, but now it's just a bargain.

Neatness Counts

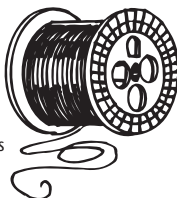

Neatness definitely counts. Even in wiring. Especially in wiring. End those electrical mare's nests with this 6-position barrier strip, rated for up to 30A at 600V. Comes with a clear plastic cover with access to the screw terminals and measures 3-5/8" x 1-1/4" x 5/8" with a 5/16" mounting hole at each end. Terminals are in pairs.

93962 Barrier Strip \$4.75/pkg(2)

A Snarl of Magnet Wire

One of those sharpie East Coast outfits pulled a fast one on this poor naive Midwestern dealer. The result is we have a pile of exotic coated magnet wire. The coatings and colors vary widely, as does the gauge of the wire. With a couple of exceptions there isn't enough of any one kind among the hundreds in the pile to list separately. So we are offering an assortment and you get whatever we grab. Either way you will get a terrific value, particularly if you have an exotic application and get just what you need. Even if you are just making a garden variety coil or electromagnet you will still find the prices are very good. So go ahead, profit from our misfortune. We are glad to be of service. Sigh.

You Pink?

Pinking shears are called pinking shears because they cut a jagged pattern like the edges of the petals on a flower commonly known as a pink (also known as a carnation), whence also the color pink, maybe. (You learn something every day, don't you?) These shears, from Fiskars®, have the familiar orange grips and 5" blades with bearings and contoured handles. Easy pinking for dressmakers, crafters, or anyone who wants to go into the artificial carnation business.

The Penny Cutters

These are the so-called miracle shears from Pakistan. They were designed for use by paramedics and others needing quickly to cut wire, light sheet metal, or other tough stuff that might stand between them and their quarry. They are normally demonstrated cutting a penny in two. Which they will do. But not as a steady diet. Let's dispel a few myths. While these are Pakistani stainless, we're not talking any miracles in manufacturing. They are good for their purpose, and real handy to have in the old tool box. But their purpose isn't making pennies into 5-mil pieces, and you will twist or break them at about the same time you find out that you've done the same thing to U.S. laws! For sheet metal or wire or fishing leaders or tin cans or whatever, be our guests.

Super Sharp & Super Safe

The secret is ceramics. This 5-1/2" long precision cutter has a ceramic point that's as sharp as an X-actly knife, stays sharp longer, is easier to maneuver in intricate cutting patterns, and is nearly impossible to cut yourself with. Cuts paper and card stock easily. Pencil-style, with a cap. A boon for crafters, and a blessing for junior crafters.

Cut Right To It

This all-purpose scissors is the favorite of everyone at A.S.&S.: Pat uses his to cut and strip wire. C.J. uses his to slit the tape on packages. Mary Ann uses hers to open bags of pretzels. It's 6-1/4" long overall, with a very sharp 2" stainless steel blade and large, comfortable handles. (Colors will vary). It would sell for \$9.95 retail if it was new, but it was used for one day to cut cloth in the assembly plant of a major car company, then discarded. Quality control is a wonderful thing.

The Monkey Grip

Measures 8" long and opens to 15/16" max. Has a 7/8" reticle below the jaw, a cushion grip and a bonus 9/16" box wrench at the bottom of the handle, just for monkeying around.

Dwarf Hammer

Even Grumpy would be happy if he had this very cool, stub-handled claw hammer to work with. It packs the punch of a 10-oz hammer, but is only 6" long overall, so it fits nicely in a sleepy cottage in the forest - or a studio apartment, emergency toolbox, or kitchen drawer. It's ideal for crafts, picture hanging and other dopey little jobs, but we wouldn't be bashful about using it for any hammer-type task. The manufacturer did doc the size of the drop-forged steel head a little (4-1/2" head to claw), but they gave it a heavy-duty frame, a contoured rubber grip, and a small magnet in the head for starting brads and nails. And we gave it a price that's nothing to sneeze at.

Ratchety Wrench

Call it the crescent wrench made easy. The Adjustable Rapid Wrench™ is a 10" crescent wrench with a padded handle and a special tooth in the jaw so it ratchets back or forward, which means you don't have to keep taking it off the nut and putting it back on while it keeps getting looser and not fitting so you just have to adjust it all over again, which drives us nuts, too, or did until now. Jaws open to 1-1/2". Plus you get a bonus 4-draw, 18-1/2" long swivel-head magnetic pick-up tool, for when you do the last few turns with your fingers and drop the bolt.

The (100) -- count 'em, (100) -- chrome vanadium driver and bit attachments include slotted, Phillips, square (Robertson) head, torx, hex and 12-point bits, plus security Phillips, torx and hex, and (4) different driver adapters (one of which, a super-cute cup-hook driver, has us oddly excited). They're all in a flip-top plastic case. How come it's surplus? If you turn it upside down and shake it, some of the bits fall out of their little size-marked slots. So don't do that. Or stick a thin sheet of foam inside it and all will be well.

We won't say magic, what with Science being our middle name, but these cut-resistant, composite-yarn technology gloves are pretty mystifying.
